Opportunity to  
**DOUBLE your INCOME**  
as a Certified Hospital Psychologist!

"Doing what others did not care to do provided me with an average annual salary of approximately two or three times the average PhD psychologist..." Art Llorca, FACFEI, DABFE, CHP

experience

As private practice is shrinking, it is **critical** that psychologists bring their **skills** and **abilities** to their patients.

Requirements for certification:

- Membership in the American Psychotherapy Association®
- Doctorate in Psychology
- Licensure as a Psychologist
- Successful completion of the CHP course and examination

70% of patients have overlapping emotional issues

## Bring your skills to the patients. Become **Certified in Hospital Psychology.**

The American Psychotherapy Association® is offering a new certification in Hospital Psychology. There are unique skills that are wanted and needed in hospitals, and the Certified in Hospital Psychology, CHP<sup>SM</sup>, Program provides the means, supplementary knowledge, and training to effectively integrate the psychologist into the hospital setting.

unique skills

“In the first year that I added hospital practice to my regimen, my **income climbed over 100 percent.** I was required to see patients both in the hospital and they were referred to my office.” **M. Baer, PhD, CHP**

The psychologist’s knowledge of effective behavioral treatments, neuropsychology, and specialized awareness of useful interventions is a necessary part of the hospital health-care team.

This certification course helps psychologists understand the application and credentialing, the culture inside the hospital, the procedures, and the knowledge that they bring in joining the medical staff. This course also prepares the psychologist to integrate as a member of the hospital staff by understanding the finances, patient care issues, rules of the hospital, and laws state by state.
